pandas 불러오기

```
In [1]: import pandas as pd
```

1. 아래의 baseball_dic에서

밑에 있는 타율, 안타, 홈런, 타점 데이터를

dictionary 형식으로 추가해서 데이터프레임을 최종 완성해주세요

column name은 타율(avg), 안타(hit), 홈런(homerun), 타점(rbi)로 해주세요(한글x)

```
In [3]: df = pd.DataFrame(baseball_dic)
    df
```
